

## GREAT NEWS FOR ALL LEGO LOVERS!

RSU 13 has made tentative arrangements with MAINE ROBOTICS (<http://www.mainerobotics.org/index.html>) to sponsor a LEGO Robotics day camp at Rockland District Middle School July 23 – 27.

The following information is located on the Maine Robotics Camp home page:

### **The 2012 Robotics Camp Season is now open!**

You may either register online, which will take care of all your paperwork except for the required MEDICAL TREATMENT FORM, which is available on the Forms and Documents link to the left.

OR you can register by filling out the registration form and mailing in with payment and the required forms. To register by mail, please visit our website [CAMP HOME PAGE](#) for everything you will need.

Lunch is a bag lunch which each camper must bring with them. Campers design, build and program robots during the week and the teachers help them learn fundamentals of design, engineering, programming, and robotics.

The program is non-competitive and children work in groups of two (and occasionally groups of three if they choose to). Each group works on projects and missions assigned at the beginning of the day and continues through the day and into the week. As they get more skills they have the opportunity to work on their own projects.

Please go to the Camp Home Page and watch for registration information.
